Week 2 Node Express API

Assignment: Build & Deploy Your API

This project is an Express API that includes:

- GET /api → `My Week 2 API!`
- POST /user → accepts `name` and `email`, then responds `Hello, [name]!`
- GET /user/:id → responds `User [id] profile`
- JSON parsing
- 400 error handling for missing POST data
- `.env` configuration for PORT
- Static HTML page
- Custom request-logging middleware
- 404 and general error handling

1. Install Node.js

Make sure Node.js is installed.

Check with:

```
```bash
node -v
npm -v
```
```

2. Install dependencies

Inside the project folder:

```
```bash
npm install
```
```

3. Start the server

```
```bash
npm start
```
```

The server should run on:

```
```text
http://localhost:3000
```
```

4. Test the API

Open the static page

Visit:

```
```text
http://localhost:3000/
```
```

Test GET /api

```
```bash
```

```
curl http://localhost:3000/api
```

```
```
```

Expected:

```
```text
```

```
My Week 2 API!
```

```
```
```

Test POST /user

```
```bash
```

```
curl -X POST http://localhost:3000/user -H "Content-Type: application/json" -d '{"name":"Samuel","email":"samuel@example.com"}'
```

```
```
```

Expected:

```
```text
```

```
Hello, Samuel!
```

```
```
```

Test missing data

```
```bash
```

```
curl -X POST http://localhost:3000/user -H "Content-Type: application/json" -d '{"name":"Samuel"}'
```

```
```
```

Expected HTTP status:

```
```text
```

```
400
```

```
```
```

Test GET /user/:id

```
```bash
```

```
curl http://localhost:3000/user/123
```

```
```
```

Expected:

```
```text
```

```
User 123 profile
```

```
```
```

5. Git and GitHub

Create a GitHub repository named:

```
```text
```

```
week2-node-express
```

```
```
```

Then run:

```
```bash
```

```
git init
git add .
git commit -m "Build Week 2 Express API"
git branch -M main
git remote add origin YOUR_GITHUB_REPOSITORY_URL
git push -u origin main
```
```

Do not upload ``.env`` because it is included in ``.gitignore``.

Submission

Submit the GitHub repository link after pushing the project.
